LETTER OF SUPPORT

Dear islanders.

Having been part of Árainn Mhórs efforts to analyse and develop energy issues of its small island society through the *Smilegov* project, it is with great interest and hope that ESIN – the European Small Islands Federation – learns that Árainn Mhór is planning to upgrade insulation and heating systems on the island.

Being a part of the European *Pact of Islands*, it seems Árainn Mhór is taking its responsibility for reaching the European 20-20-20 targets. The eleven ESIN nations, representing 1,400 islands and 600,000 islanders, will be closely following your progress, using you as a benchmark.

Wishing you sustainable progress, I send my greetings to your island.

Christian Pleijel

Vice President, ESIN
